Fall 2017 CIS 3362 Homework #7 Grading Criteria

Give an automatic 100% if

(a) The write up has two items that hash to the same value (and you verify that they do)

and

(b) The code attached and description are consistent with the matches found.

If no match was found, give a maximum grade of 50. Decide partial as you see fit. If they tried and there is some attached code, just go ahead and give the 50.

If there is a match but scant evidence of how the match was found or it's not consistent with other submitted materials, give a 75.

No submission is a 0.

Grader uses judgement for all ambiguous cases.
