

Fall 2018 CIS 3362 Homework #2 Grading Criteria

Each question is worth 25 points. If the cipher is broken and there is a reasonable discussion about the process, give full credit.

If a cipher IS NOT broken, but reasonable efforts are described to try to break it, then give a maximum of 15 out of 25.

If a cipher is broken, but the description/write up is inadequate to justify the results, then in between 15 and 20 points, depending on how incomplete you think the write up is.
