COP 3223 Section 1

Practice Problems #1 – Fall 2011

Instructor: Dr. Joseph J. LaViola Jr.

1. Download the `dweight2.c` program from WebCourses. Compile and run the program. Modify the program so that users can enter floating point numbers instead of integers. The output of the program should be a floating point number as well.

2. Download the `celsius.c` program from WebCourses. Compile and run the program. Modify the program so that it converts temperatures from Celsius to Fahrenheit instead of Fahrenheit to Celsius.
