COP 3223 Section 1

Practice Problems #3 – Fall 2011

Instructor: Dr. Joseph J. LaViola Jr.

1. Download the `broker.c` program from WebCourses. Compile and run the program. Modify the program by making the following changes:

    a. Ask the user to enter the number of shares and the price per share, instead of the value of the trade.
    b. Add statements that compute the commission charged by a rival broker ($33 plus 3 cents per share for fewer than 2000 shares; $33 plus 2 cents per share for 2000 shares or more). Display the rival's commission as well as the commission charged by the original broker.
