

COP 3502 - 11/22/2021

Foundation Exam Info

→ Please read webcourses message for exam links!

- 1. Sleep Early

Strategy When Taking Exam 0. Eat a good breakfast.

1. Read through it, only solving "fast" questions you know how to do immediately.
2. On second pass, all questions you know how to do but take longer, go ahead and do those.
3. Go through the questions that are left. Try to break down into smaller pieces and at least get some partial credit (base cases, sum breakdown, recurrence relation - 3 iterations, etc.)
4. Double Check stuff you're already answered.

Long Term Studying

First time - you just took class, you have 1 month struggle - not forget stuff

1. Take Practice Exam. Identify weaknesses
2. Over next couple weeks, work on the weaknesses one by one (coding, working prob's paper, look at course notes, etc.)
3. Last week take 2 more pre exams. Reflect.
