

Mingjie Lin

Department of Electrical Engineering & Computer Science
HEC Building, Room 237
Orlando, FL 32816

(O) 407-882-2298

<http://www.eecs.ucf.edu/~mingjie>

Education/Work

[University of Central Florida	Orlando, FL
[Associate Professor, EECS	January 2017 - Now
[University of Central Florida	Orlando, FL
[Assistant Professor, EECS	January 2011 - 2017
[UC Berkeley	Berkeley, CA
[Post-Doctoral Scholar, EECS	March 2009 - August 2010
[Tabula Inc.	Sunnyvale, CA
[Senior Engineer	June 2008 - March 2009
[Stanford University	Stanford, CA
[Ph. D., Electrical Engineering	September 2001 - 2008

Research Interests

Areas—Integrated Circuit and System Design, Reconfigurable Computing, and Computer Architecture.

Themes—My research focuses on developing alternative, non-Boolean, non-CMOS computing paradigms capable of penetrating the digital CMOS computational efficiency barrier posed by quantum-related device physics. Specifically, we investigate how to transcend deterministic computing by natively exploiting randomness-driven physical phenomenon, either from CMOS devices under extreme conditions or from emerging spin-torque devices, to effectively compute.

Awards and Honors

1. UCF Reach for the Stars (1 of 5 recipients), 2017.
2. CECS Dean's Advisory Board Faculty Fellow, UCF, 2017.
3. NSF CAREER award, CISE-SHF, 2016.
4. UCF Teaching Incentive Program (TIP) Award, 2016
5. AFOSR: Summer Faculty Fellowship Award (USAF-SFFP), 2016
6. SAIC Faculty Fellow, 2014

Selected Publications

Note: * denotes the corresponding author. † denotes the student author from Dr. Lin's research group.

Current Contract or Grant Activities

1. **Hardware-Assisted Research Platform for Topographical Robotic Control with Infinity DOF.** Amount: \$194,162.00. Share: 100%. PI. DoD DURIP from the Office of Naval Research. 2017.
2. **University Professor Engagement: Scouting Area of Artificial Intelligence and Deep Learning.** Amount: \$25,000.00. Share: 100%. PI. Siemens Energy, Inc.. 2017.
3. **CAREER: iMPACT: Metaphysical and Probabilistic-Based Computing Transformation with Emerging Spin-Transfer Torque Device Technology.** Amount: \$541,321.00. Share: 100%. PI. NSF SHF. 2016.
4. **Bio-Inspired Logic Design with Graph and Field Theory.** Amount: \$271,642.20. Share: 100%. PI. NSF SHF. 2013.
5. **Minimum-Energy Bio-Inspired Analogic Computing Devices with Stochastic Switching Transistors under Ultra-Low VDD.** Amount: \$148,416.00. Share: 100%. PI. NSF BRIGE. 2013.
6. **Hardware-Assisted Large-Scale Neuroevolution for Multiagent Learning.** Amount: \$201,500.00. Share: 49%. PI. DoD DURIP. 2012.

7. **Discriminatively Fortified Computing for Integrated Circuit (IC) Devices.** Amount: \$7,500.00.
Share: 100%. PI. UCF. 2011.
8. **Collaborative Research: Florida-IT-Pathways to Success (Flit-Path)** . Amount: \$1,526,600.00.
Share: 6%. Co-PI. NSF. 2016.
9. **Multi-functional Integrated System Technology Center (an NSF I/UCRC).** Amount: \$1,000.
Share: 2%. UCF Faculty Member. NSF. 2015.
10. **REU Site: Research Experiences in the Internet of Things (IoT)** Amount: \$12,675. Share: 5%.
co-PI. NSF. 2015.
